foundation

# CIRCLES

## Introduction:

- Gather the students in a group.
- Explain to the students what the activity is going to be.
- Provide understandable explanations to the students regarding the terms such as "circle", "radius" and "diameter".

## Objective:

- To teach the students about circles.

## Pre-Assessment:

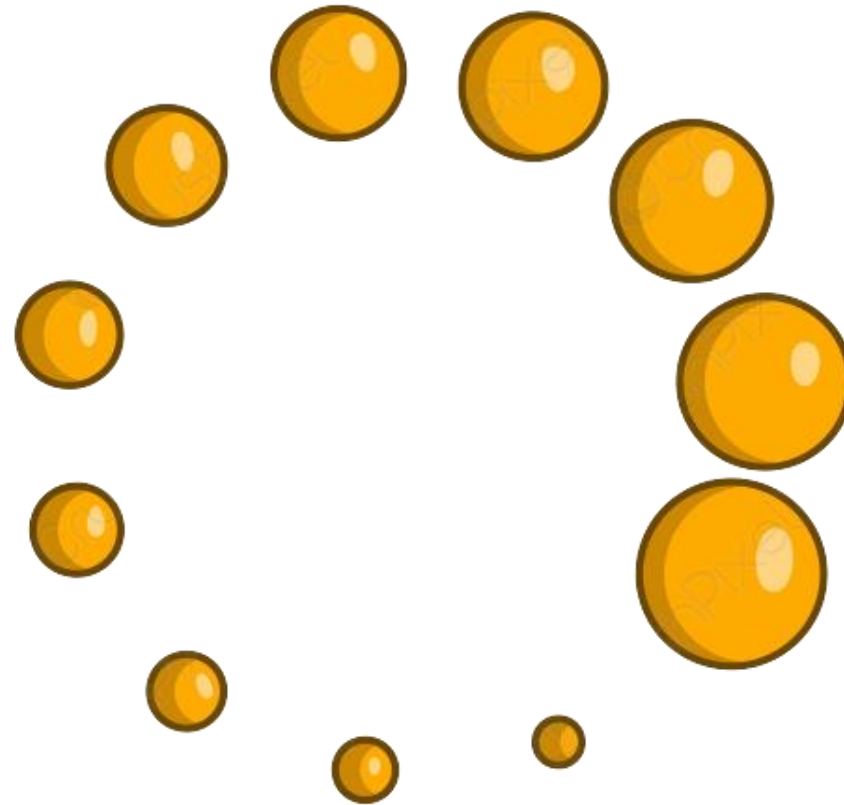

- Level-1 Ask the students what a circle is and how to recognise them.
- Level-2 Ask the students about the properties of a circle and ask them about radius and diameter.

# LEVEL-1

**Materials Required:** A4 sheets

**Activity:**

- Cut the papers into circles with different diameters.
- Ask the students to match the circles using the circumference of the circle.
- The student who matches the highest number of circles wins.

# LEVEL-2

**Materials Required:** A4 sheets, compass, crayons/color pencils

## Activity:

- Firstly, teach the students how to draw a circle using a compass.
- Then ask the students to draw a circle and create a symmetrical pattern inside it.
- Later ask them to colour it.

## Post-Assessment:

- Ask the students to sit in a circle.
- Then ask them to point out things that they find in circle shape inside their classroom.
- Ask the students to clean up their supplies.
